

Summit Pathology Volumes 2015-2021

Data included in analysis

All cases signed out between 01-01-2015 and 12-31-2021 were exported from LigoLab and included in the analysis. There were 2,580,088 total cases signed out, including cases re-released with revisions. Annual volumes were calculated as the total number of unique accessions, unique Result IDs, and the total count of CPT codes. The 80000 (non-billable) CPT code was excluded from the annual CPT code volume calculations. Table 1 below summarizes volumes by these three metrics from 2015 – 2021.

Table1. Annual Volumes by Accessions Result IDs, and CPT Codes

Year	Accessions	Result IDs	CPT Codes
2015	127,699	235,138	312,929
2016	141,304	253,883	352,661
2017	152,538	266,022	385,104
2018	166,649	285,688	423,031
2019	178,230	298,207	472,307
2020	160,510	267,600	433,870
2021	184,948	320,933	462,732
